MARINE MICROPALEONTOLOGY

Contents Volume 25, 1995

Research Papers

Late glacial–Holocene paleoclimatic and paleoceanographic evolution of the Aegean Sea: micropaleontological and stable isotopic evidence
A.E. Aksu, D. Yaşar, P.J. Mudie and H. Gillespie 1

Planktic foraminiferal events in early Miocene Zones N.6 and N.7 at southwest Pacific DSDP Site 593: relation with climatic changes in oxygen isotope Zone Mi1b
G.H. Scott, C.S. Nelson and H.H. Stone 29

An Oligocene multi-species foraminiferal oxygen and carbon isotope record from ODP Hole 758A (Indian Ocean): paleoceanographic and paleo-ecologic implications
A.J.M. van Eijden and G.M. Ganssen 47

Ecology, morphology, stratigraphy, and the paleoceanographic significance of *Cycladophora davisiana davisiana*. Part II: Stratigraphy in the North Atlantic (DSDP Site 609) and Labrador Sea (ODP Site 646B)
P.F. Ciesielski and K.R. Bjørklund 67

Deep-sea biostratigraphy of prograding platform margins (Neogene, Bahamas): key evidence linked to depositional rhythm
B.H. Lidz and D.F. McNeill 87

The taphonomy of deep-sea benthic foraminifera: comparisons of living and dead assemblages from box and gravity cores taken in the Sulu Sea
A.E. Rathburn and Q. Miao 127

Benthic foraminiferal distribution at Middle Valley, Juan de Fuca Ridge, a northeast Pacific hydrothermal venting site
K.E. Jonasson, C.J. Schröder-Adams and R.T. Patterson 151

Benthic foraminiferal distribution and recolonization of formerly anoxic environments in Drammensfjord, southern Norway
E. Alve 169

Distribution patterns of live planktic foraminifers as related to regional hydrography and productive systems of the Mediterranean Sea
C. Pujol and C. Vergnaud Grazzini 187

Obituary 219

Research Papers

Reworked Paleogene to early Neogene planktic foraminifera: implications of an intriguing distribution at a late Neogene prograding margin, Bahamas
B.H. Lidz and D.F. McNeill 221

Benthic foraminiferal distribution and abundance changes in Skagerrak surface sediments: 1937 (Höglund) and 1992/1993 data compared
E. Alve and J.W. Murray 269

Erratum 289
